Subject Index Volume 271

Acne, cyproteronacetate 183
Ageing 341
Akne 128
Alopecia, areata 265
Antiacanthogenic effect 3
Antigen-induced polyclonal B-cell activation psoriasis 38
Anti-guinea pig C 3 cornified surface 377
Arylsulfatase XRI 153
Atopic dermatitis 429; 432
Autosomal dominant ichthyosis 149
AZA in grafted mice melanoma 202
Azelaic acid, local treatment 197

Balloon cells 283
Blood chemiluminescence 205
Bromocriptin 437

Candida albicans 373
Carrier reaction 3
Chemoattractants 212
Chemotactic factor generation 259
Chemotactic response to zymosan-activated serum 261
Chemotaxis 262; 373
China ink collagen fibrils 368
China ink giant cell formation 370
Chronic discoid lupus erythematosus 165
Chronisch polymorphe Lichtausschläge 143
13-cis retinoic acid 205
13-cis retinoid acid therapy serum cholesterol 192
13-cis retinoic acid therapy serum triglyceride 191
13-cis retinoic acid zymosan-induced CL dose response 209
Clobetasol-17-propionate 5
Colchicine 373
Cold and heat, urticaria 447
Combustion apparatus 242
Con A-stimulated PBMC cultures 262
Condylomata acuminata viral particles 89
Contact sensitivity 135; 361
Corticosteroids 3
Corticosteroid/Salicylsäure, percutane Adsorption 20
C3 receptors 59
Cutaneous angioleiomyoma 91
Cyproteronacetate, acne 183
Cyproteronacetate side effects 185

Dense-cored filamentous body 237
Dermatitis herpetiformis elemental diet 455
De sanctis-cacchione syndrome 341
Device, electronic 447
Dialysis 403
Dialysis, psoriasis 401
DNA repair 407
DNA synthesis activity keratinocytes 41
DNA synthesis time keratinocytes 49
DR 3 scleroderma 384

Electronic device testing cold and heat urticaria 447
Electrophoretic profiles of microsomal protein 419
Endothelial cells Weibel-Palade bodies 96
Eosinophilia progressive systemic sclerosis, localized scleroderma 411
Epidermal adenyl cyclase 325
Epidermal antigens 73
Epidermal cell proliferation diurnal variation 41; 49
Epidermal cell suspensions 245
Epidermal cells trypsinised scanning electron micrographs 248
Epidermal differentiation 73
Epidermal upper-cytoplasmic antigens 73
Epidermal H-thymidine labeling indices diurnal variations 43
Epidermis transglutaminase 101
Epidermodysplasia verruciformis 283
Epithelial thickness 5
Erythrasma 128

Familial incidence psoriasis 323
Fc receptor-bearing cells 112
Fibroblasts 341
Flumethasone privalate 19
Fremdkörperreaktion 367
Frequency of application 391

Generalized morphea 383
Glucose-6-phosphate dehydrogenase 341
Glomus tumor 91
Granulate chemiluminescence 205
Granulocyte chemotaxis 259
Griseofulvin, percutaneous absorption, human skin 275

H^3-2,8 adenine into rat skin 332
Hartgelatinekapseln (8-MOP in Pulverform) 15
Hauthelligkeitsänderung 26
Hauttestfeld 22
Hexachlorocyclohexane 388
^{3}H-griseofulvin 276
^{3}H-griseofulvin excretion of 278
^{3}H-griseofulfin skin layers ^{3}H-proquazone 279
Histamine 325
Histamine adenylate cyclase 337
Histamine degrading enzymes 357
Histamine receptors 325
Histamine release egg albumin antigen 357
Histiocytosis X circular Langerhans cell granules 60
HLA antigens 381
HLA A9 scleroderma 384
HLA phenotypes 317
HLA psoriasis 315
^{3}H-8-MOP radioactivity in rat organs 161
Horny layer infrared spectroscopy 305
Human hair shafts elements energy-dispersive analysis of X-rays (EDAX) 271
Human growth hormone 437
Human keratinocytes trypsin 245
Human pregnancy zone 135
Hydration 429
Hydration of the stratum corneum 310

Ig secretion rate saliva 63
Immunity, cell-mediated 265
Immunofluorescence 295
Immunoglobulins whole saliva 63; 68
Immunsuppression 135
Induction of hapten-specific suppression DNFB 362
Infrared spectroscopy 429

Keratinocytes DNA synthesis activity 41
Keratinocytes U-CYT antigens 79
Keratin polypeptides 83
Keratin polypeptides types of warts 86
Koproporphyrin 133
Koproporphyrintetramethylester 131

Langerhans cells 361
Langerhans cell as a "killer" cell 60
Langerhans cell granule 55
Langerhans cells immunologic role 59
Lentigo maligna 197
Lindane concentrations 393
Lindane concentrations in the blood of volunteers 390; 391
Lindane percutaneous absorption 387
Lymphocytes and PWM 34

Macules, hypomelanotic 171
Measurement of the water content 305
Melanocytic perikarya 175
Melanosomes average size 180
Membrane fluorescence tumor cells 444
Membrane markers immunofluorescence in psoriasis 299
Membrane proteins 419
Methotrexate 29
8-Methoxypsoralen 11
8-Methoxypsoralen galenical Form 461
Mitochondrial membrane proteins 425
Mitomycin C 407
Moisture values age 434
Moisturizer definition 435
8-MOP 157
8-MOP eye, skin, liver, serum, lens 162
8-MOP serum levels 11
Mycosis fungoides 237
Myeloperoxidase 205

NaF histamine release 337
Ninhidrin-positive substances 403
Nuclear membrane proteins 425
Nuclear membranes 426

Papilloma viruses 83
Parakristalline virusaggregate stratum corneum 291
Parotid saliva flow rate 63
Parotid saliva IgA 68
Pemphigoid 73
Pemphigus 73
Pemphigus lymphocyte studies 111
Pemphigus lymphocyte subpopulations 113
Penetration kinetics 387
Percutaneous absorption, griseofulvin, human skin 275
Percutaneous absorption sex dependency 393

Percutaneous penetration 241
Peritoneal exsudate cells 347
Permeability of the stratum corneum monoglycerides 275
PG-s as mediators of UVL-induced inflammation 146
Pharmacokinetics 157
Photodermatosis 143
Picryl chloride 135
Plane warts spontaneously regressing 55
Plantar warts hyperkeratotic 89
Plasma $PGF_{2\alpha}$ values 145
Pokeweed mitogen 29
Polymorphonuclear leukocyte 373
Polymorphonuclear leukocytes candida-killing activity 271
Porphyria cutanea tarda 143
Porphyrinproduktion Propioni-Bakterien 127
Progressive scleroderma, thyreotropin 451
Progressive systemic sclerosis 383
Propioni-Bakterien Porphyrinproduktion 127
Prostaglandin $F_{2\alpha}$ 143
Protein (PZP) 135
Protoporphyrindimethylester 131
Psoriasis and human growth hormone 463
Psoriasis antigen-induced polyclonal B-cell activation 38
Psoriasis, dialysis 401
Psoriasis HLA 315
Psoriasis immunological features 29
Psoriasis increased HGH level 465
Psoriasis secondary autoimmune phenomena 351
Psoriasis vulgaris 29; 63; 259; 271; 295; 317; 437
Psoriasis vulgaris natural killer cell activity 107

Qualitative analysis 215

Raynaud's disease 451
Reflexionsspektren 22
Retinoic acid as an anti-inflammatory agent 206
Retinoids 347
Riesenzellbildung 367
Risk factors 13-cis retinoic acid 189
Ro-109359 29
Ro-109359 IgG secretion 37

Salicylic acid 19
Scabious patients lindane levels 387
Schaffer collector 65
Scleroderma 381
Sebum 215
Sebum excretion quantitative differentiation 222
Serum levels, progressive scleroderma 451
Serum lipids 13-cis retinoic acid 189
Serum of scabies patients 393
Serum TSH 451
Sister chromatid exchange 407
Skin adenyl cyclase activity 332
Skin distribution of fluoride 327
Skin fluoride levels 329
Skin histamine content 328
Skin histamine receptor assays 327
Skin histamine receptors 330
Skin O_2 diffusion resistance 121
Skin penetration of antigen 357
Skin treated with 1% NaF 335
Skin tumors 419
Somatostatin 437
Steroid sulfatase 149; 153
Stratum corneum 429
Stratum corneum hydration 432
Suppressor T cells 361
Surface fat non invasive sampling 217
Surface membrane immunoglobulin 112

Tatauierung 367
TGase activity inhibitors lysosome fraction 103
Thalidomide 165
Thalidomide treatment side effects 169
Theophylline-sensitive T cells 268
Thyreotropin, serum levels 451
Tolerance induced by pretreatment with DNFB 363
Topical fluorides histaminergic mediation 325
Transcutaneous PO_2 resistance 119
Trypsin human keratinocytes 245
Tuberous sclerosis 171
Tumor cell lines pemphigus-like antigens 441

Uncombable hair syndrome 223
Uroporphyrinoctamethylester 131
Urticaria, cold and heat 447
UV-light 143

Vasoconstriction 19
Verrucosis generalisata 283

Washing to prevent absorption 387
Weibel-Palade bodies 91
Weichgelatinekapseln (8-MOP in Lösung) 15
Wet ash 241
Wet ashing 242
Wet ashing measurement of low level cabon-14 241

Xeroderma pigmentosum 341; 407
X-linked recessive ichthyosis 149
XRI and ADI simultaneous occurrence 151

Zymosan-induced chemiluminescence 205
Zymosan-induced CL luminol 211
